

Professional Summary

I am a Flutter developer and have passion of creating exceptional mobile experiences with smooth UI, efficient state management, and scalable backend integration. I build IOS and Android app and have experience making WebApp, MacOS and desktop app using same codebase.

I am currently seeking opportunities to contribute to innovative mobile app projects and grow as a full-stack Flutter developer.

Skills

Mobile Development:	<i>Flutter, Dart, Bloc, Provider</i>
Backend & APIs:	<i>Firebase, Supabase, REST APIs</i>
Databases:	<i>SQLite (Sqflite), Hive (Offline DB)</i>
UI/UX & Design:	<i>Figma, Adobe Illustrator, Adobe Photoshop, After Effects</i>
Monetization:	<i>AdMob, Start.io Integration</i>
Tools & Others:	<i>Git/GitHub, Agile Development, React.js, Next.js, HTML/CSS/JS, Python, C, C++, playwright (Python browser automation)</i>

Experience

Wabu Tech, Nepal

July 2025 - November 2025 (3 months)

- Implemented app localization in Nepali and English Language in customer and driver app.
- Changed google map Api to Baato Api (baato.io) for Map feature in Customer and Driver app.
 - Used search Api to search with query.
 - Used Reverse Search Api and got place id by sending latitude and longitude.
 - Used Places Api to get detail information of place by sending place id.
 - Used Nearby places api by limiting responses and sent the lat and lan of required place nearby to find.
 - Used Direction api to get polyline (by sending destination and starting point lat & lan with mode).
 - Integrate polyline such that UI and UX are unharmed.
- Created History Screen such that feedback can be sent and edited with emoji and comment towards the riding experience and driver.
- Ensured everything stay smooth after update by checking, testing with each integration.

Personal Projects

Personal Project ([CodeSpeedTest.com](https://codespeedtest.com))

November 2025 - Present

Coding Speed testing Platform for 500+ languages and **frameworks** with **libraries**.

We all are familiar in some tech stack so instead of testing speed in simple words typing, why not see our speed in our own tech stack. This platform is for everyone who wants to check their typing speed in their tech stack.

Technologies: React, Next.js

ARB Translator Gen Z

localization package for generating ARB files and translating content for developers to decrease headache.

Technologies: Flutter, Dart, and flutter packages

Endpoint: https://translate.googleapis.com/translate_a/single

Code Link: https://github.com/sauravkhanalgit/arb_translator

Live Link: https://pub.dev/packages/arb_translator_gen_z

FinTruth App iOS/android

Finance tracker with expense management

Technologies: Flutter, Dart, Provider, Hive

Code Link: <https://github.com/SauravKhanalgit/FinTruth>

Eye Break App macOS

App that let you to look aside for 20 meter away for 20 seconds to reduce eye strain

Code Link: https://github.com/SauravKhanalgit/Eye_Break_App_MacOS

Flutter unify

A Flutter project aimed at unifying Flutter development components, tools, or utilities. It likely provides a centralized solution for common Flutter development patterns or shared functionality across multiple Flutter applications.

Code Link: https://github.com/sauravkhanalgit/flutter_unify

Live Link: https://pub.dev/packages/flutter_unify

Kati gate MacOS

MacOS app to display Nepali date at notification bar of MacOS.

Code Link: https://github.com/SauravKhanalgit/kati_gatte

Quick Recall App iOS/android

Memory enhancement app with flashcards, progress tracking, and Start.io monetization.

Technologies: Flutter, Dart, Hive

Link: <https://github.com/SauravKhanalgit/quickrecall>

Organize App iOS/android

All-in-one life management app with tasks, Social Management, finance, and chat features.

Technologies: Flutter, Firebase, Bloc, AdMob

Link: <https://github.com/SauravKhanalgit/Organize-APP/releases/download/V2/Organize.apk>

Notes App with Bloc iOS/android

Notes app using Bloc for state management and SQLite for offline database.

Technologies: Flutter, Bloc, SQLite, Dart

Link: <https://github.com/SauravKhanalgit/my-notes>

Code Speed Test (Web)

Website to measure coding speed across 500+ languages and frameworks.

Technologies: React, Next.js

Link: <https://codespeedtest.com/>

Education

Bachelor of Science in Computer Science and Information Technology (*Expected 2028*)

Tribhuvan University, Nepal
